Isha Korde

Special Assistant to the White House Liaison
Issaquah, Washington, United States

Summary

I have built much of my career in the fields of public health and environmental science, most recently working as a Special Assistant at the Department of Energy in the White House Liaison's Office.

My passions primary lie in conducting fieldwork and applying my knowledge of environmental justice in ways that are able to impact individuals on a personal level. In past roles, I have spent weeks conducting ecological surveys and collecting data regarding endangered species with U.S. Fish and Wildlife while observing the impact pollution has on delicate ecosystems. I have also assisted community members during the pandemic while in previous jobs, whether that be by testing them for COVID-19 with the University of Washington, or providing financial assistance as a case management liaison at Lane County Public Health.

I enjoy being able to find intersectionality within all my occupations and hope to continue to impact individuals in a positive way.
